

Displacement FBG

Displacement FBG (Displacement Fiber Bragg Grating Sensor)

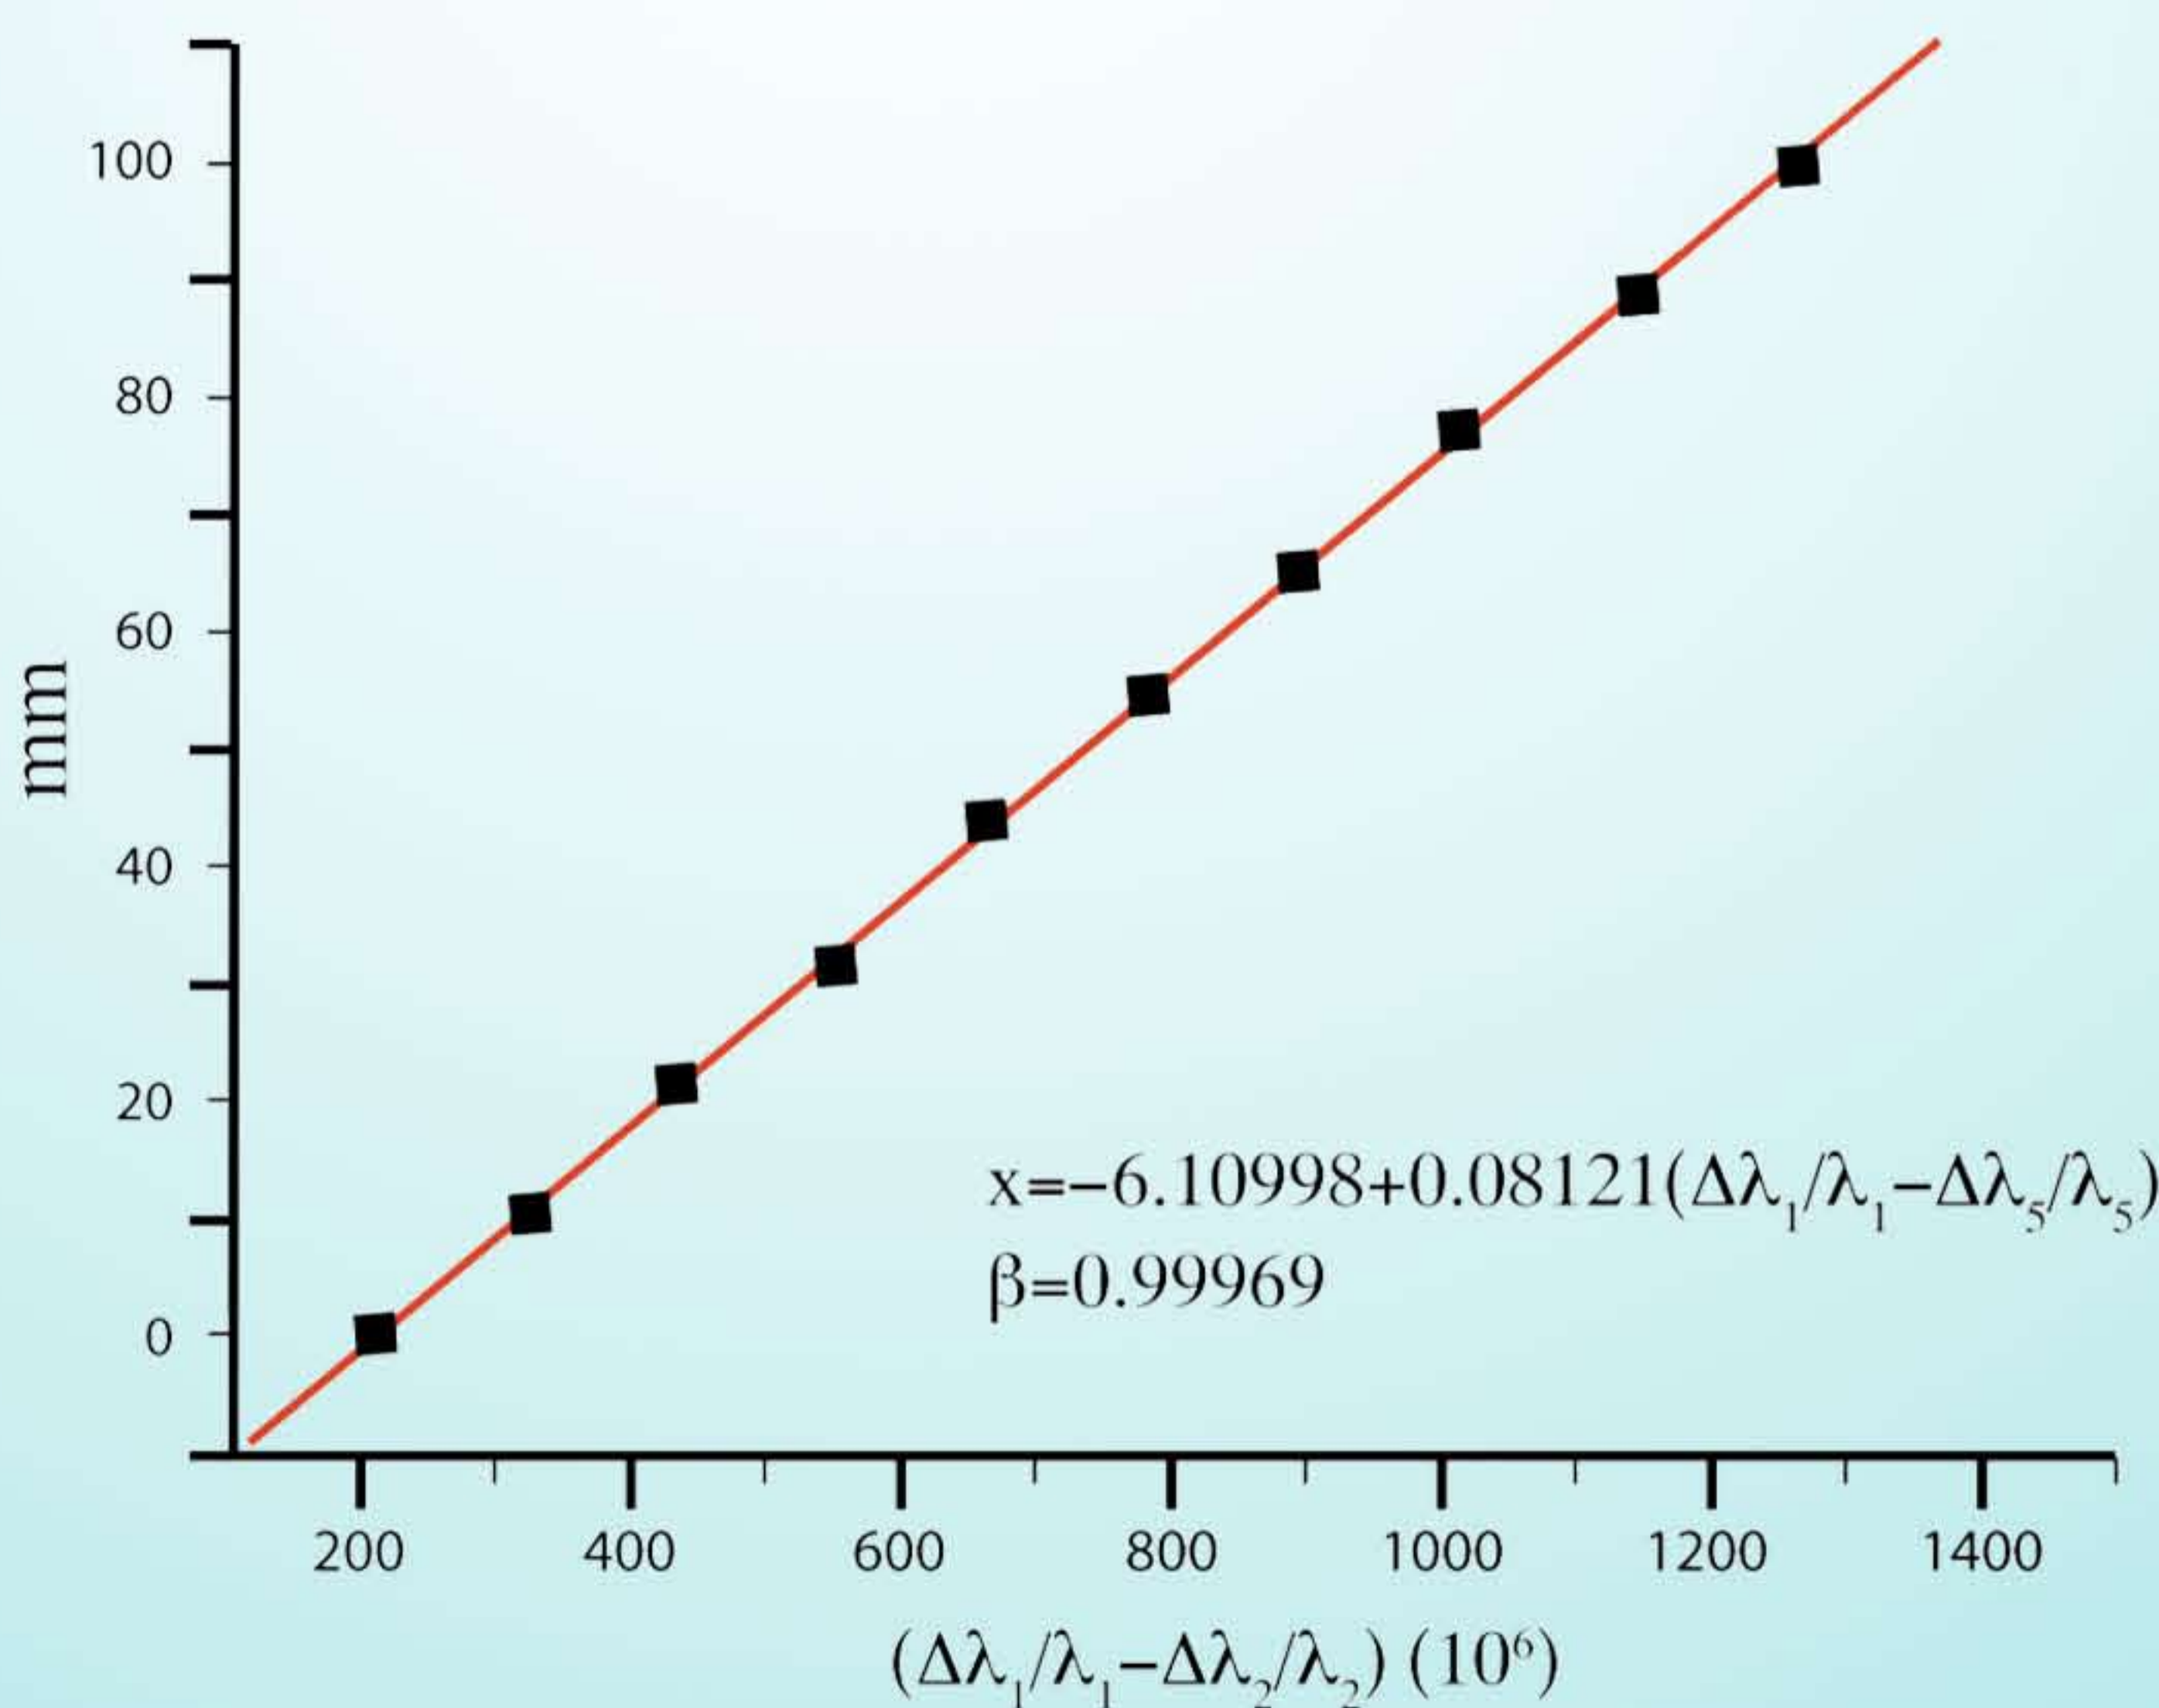

The displacement FBG is designed for displacement measurement

Displacement FBG

- Wavelength: any wavelength between 1510 to 1590nm
- Standard Range: 3mm, 30mm, 50mm and 100mm
- Accuracy: 1%
- Reflectivity: >90%
- Working Temperature: -30 to 80degC

Typical Calibration Curve
